

ATI RN Comprehensive Online Practice 2019 B with NGN//ATI RN COMPREHENSIVE EXIT EXAM RETAKE 2023- 2025 WITH NGN QUESTIONS (ACTUAL EXAM)

A nurse is conducting group therapy with clients who have breast cancer. The nurse should recognize which of the following statements by a client as an example of altruism?

"I have experienced physical discomfort when intimate with my partner since my diagnosis."

"I wish other women would stop socializing with my partner."

"I told my doctor that I would like to start a support group for other women who are sick in my community."

"I used to mistrust my doctor, but now I know that she is the best one to care for me during my illness." -

✓✓ANSWER✓✓>>"I told my doctor that I would like to

start a support group for other women who are sick in my community."

This statement indicates that the client is demonstrating altruism by reaching out and helping others.

A nurse is creating a plan of care for a client who has left-sided weakness following a stroke. Which of the following interventions should the nurse include in the plan?

Massage bony prominences on the client's left side.

Support the client's left arm on a pillow while sitting.

Position the bedside table on the client's left side.

Place the client's cane on their left side while ambulating. - ✓✓ANSWER✓✓>>Support the client's left arm on a pillow while sitting.

The nurse should support the client's affected arm to prevent the extremity from hanging freely because this can cause shoulder subluxation.

A nurse is creating a plan of care for a newly admitted child. Which of the following actions should the nurse include in the plan? (Click on the "Exhibit" button for additional information about the client.

There are three tabs that contain separate categories of data.)

Initiate droplet isolation precautions.

Keep the child on NPO status for 12 hr.

Maintain the child on bed rest for 24 hr.

Administer high-dose antibiotic therapy.

History and Physical

8-year-old male admitted with cystic fibrosis

Reports shortness of breath

Wheezing throughout lung fields

Productive cough with thick sputum

Graphic Record

Heart rate 108/min

Respiratory rate 26/min

Temperature 37.2°C (98.9°F)

Blood pressure 100/62 mm Hg

Oxygen saturation 92%

Diagnostic Results

Sputum culture: Burkholderia cepacia -

✓✓ANSWER✓✓>>The nurse should include administering high-dose antibiotic therapy in the child's plan of care. Children who have cystic fibrosis metabolize antibiotics more rapidly and require

higher doses of antibiotics to help fight aggressive infections such as *Burkholderia cepacia*.

A nurse is developing a client education program about osteoporosis for older adult clients. The nurse should include which of the following variables as a risk factor for osteoporosis?

Obesity

Acromegaly

Estrogen replacement therapy

Sedentary lifestyle - ✓✓ANSWER✓✓>>Sedentary lifestyle

A sedentary lifestyle is a risk factor for osteoporosis. The nurse should encourage older adult clients to engage in weight-bearing exercises because they will promote bone health by increasing calcium and phosphorus levels.

A nurse is performing an abdominal assessment on a client. Identify the sequence of actions the nurse should take. (Move the steps into the box on the right, placing them in the selected order of performance. Use all the steps.) - ✓✓ANSWER✓✓>>The nurse should first inspect the client's abdomen to assess skin integrity and symmetry. Next, the nurse should
